

As a daily commuter I rely upon the consistent traffic and weather reports and advisories that I get for the Boston area. I get these reports on my XM radio and have come to make them a part of my safe travel routine and my daily planning.

I urge the commission to reject NAB's petition #04-160 and any other such petition that would in any way restrict, prohibit, or modify the service that I have come to depend upon.

Respectfully,

James J. Cipoletta
